Fresh questions are asked afterward

Saved design example: Quin, Kira, Juno about Meadow. Outcomes are summarized below.

Original reader · four starting states per root · Gemma: 64 roots; Qwen: 32 roots · both training seeds shown separately
Atomic = all 16 direct/opposes questions correct across all starts; joint = 18 both/either/same questions.
Descriptive counts from saved root statistics, not a new primary test. No pooling across models, editors, or seeds.
