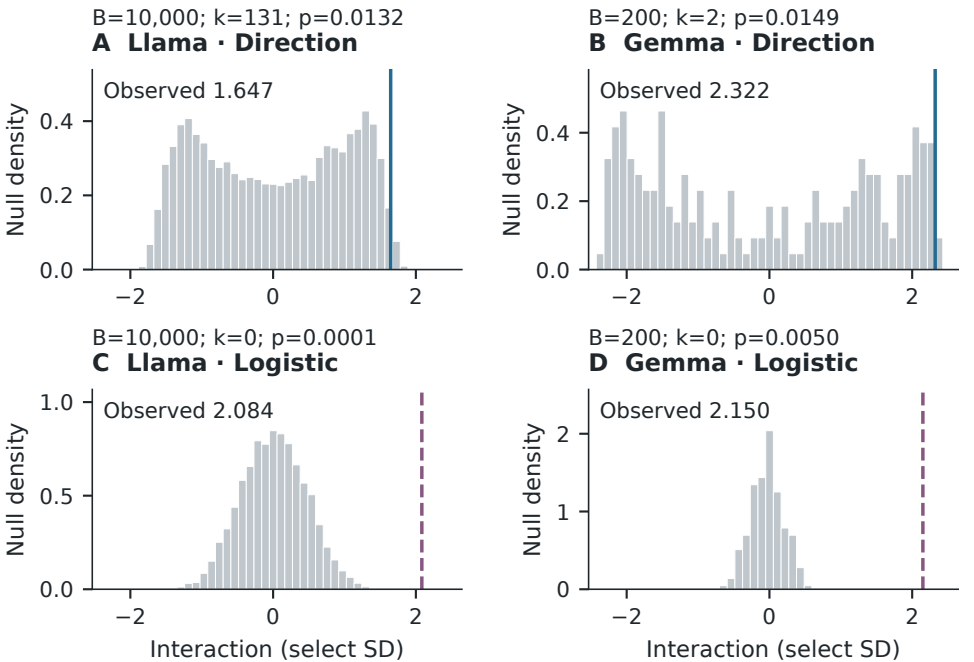
All four permutation tests, with their original nulls

Situation-level label flips; probes refitted in the original saved analysis



One-sided p = (k + 1)/(B + 1); no zero p-values or fitted null distributions.
Llama B=10,000; Gemma B=200. Original 48-bin shared histogram grid.
The earlier Llama B=200 comparator-improvement test is a different estimand.
