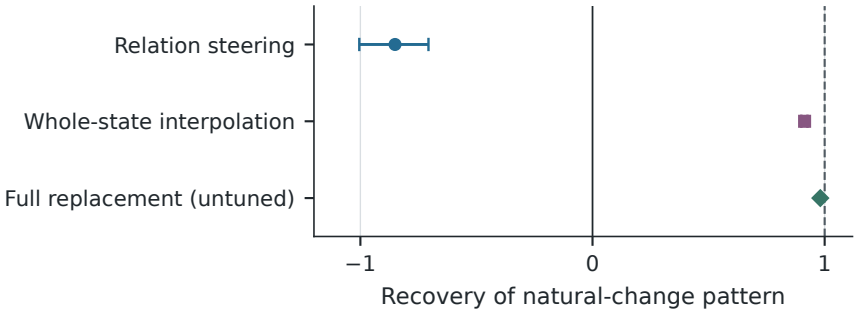
Matching the direct margin is not consequence recovery

Qualification-limited Gemma comparison · 96 contexts · not accuracy

Both tuned arms: 100% within the requested direct-margin tolerance.



0 = unchanged state; 1 = natural change; negative = farther from that pattern.
95% context-bootstrap intervals. Full replacement is not margin-tuned.
Strong-target gates failed; matched direction unqualified (frozen direction used).
Llama natural-reference qualification failed. This is not a confirmatory success.
Whole-state: 0.91358 [0.89946, 0.92597]. Full replacement interval below:
0.98127 [0.97992, 0.98255] (narrower than its marker).
