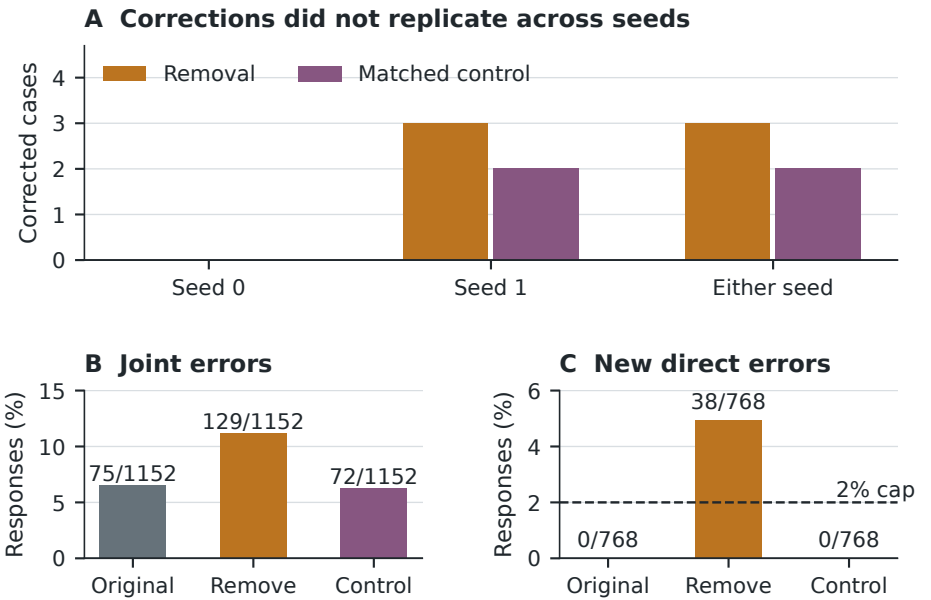
## Message removal failed the historical safety screen

16 exposed cases: 14 prior positives + 2 controls · descriptive, not prevalence



Required: ≥3 corrected cases, ≥1 per seed, ≥2 more than control, lower joint error, and ≤2% new direct errors. Four of five gates fail; branch CLOSED.
Removal: 67 new joint errors versus 13 corrections; 38/768 new direct errors.
No fresh final cases were run. No descriptive screen intervals are invented.
